READ--

ORDER:

With a view to make for grater expedition in the provision of water-supply and drainage schemes the Government have decided that the procedure followed in regard to the investigations of these schemes should be revised as follows:--

When a scheme is to be taken up for investigation, the Government will obtain from the local body concerned a general assurance that it will meet the cost of investigation of the scheme proposed to be taken up, without specifying the amount. The Government will then sanction the investigation of the scheme, at the same time authorising the Sanitary Engineer to Government to work out and sanction the estimates of the cost of investigation and to meet the cost from the Provincial funds if necessary, in the first instance. The Sanitary Engineer after sanctioning the estimates will make a demand on the local body for the amount. The taking up of the investigation need not, however, wait till the amount is deposited by the local body. The Sanitary Engineer will meet the cost from the Provincial Funds, if necessary and recover the amount from the local body as early as possible.

2. The Sanitary Engineer should, in working out the estimates of the cost of investigations, take special care that the estimates do not exceed reasonable limits with reference to the particular circumstances of each case.

(By Order of His Excellency the Governor)
